Acme Corporation: IT Security Policy

Version 1.4, effective 15 February 2026. Owner: IT Security.

1. Accounts and passwords

Passwords must be at least 14 characters long. Multi-factor authentication (MFA) is mandatory for email, VPN and all company applications.

Passwords are not rotated on a fixed schedule; they must be changed immediately if a compromise is suspected.

Computers must lock automatically after 5 minutes of inactivity.

2. Devices and data

All company laptops are encrypted with BitLocker and managed by the IT desk.

USB storage devices are blocked on company laptops. Files are shared through the company drive only.

Critical security patches must be installed within 7 days of release.

The VPN is required when working on public Wi-Fi.

3. Incidents and engineering rules

Security incidents, including lost devices and suspected phishing, must be reported to security@acme-demo.com within 1 hour of discovery.

Containers must run as a non-root user, and production images are rebuilt at least monthly.

Secrets (API keys, passwords) must never be committed to source control; they are stored in the company vault.
